PLEASE HELP ME FIND A KIDNEY!

I was born without working kidneys, and received a kidney from my mom at the age of one. That kidney worked for 25 years, but in 2021, I started on dialysis and have been waiting for a new kidney. Many people do not survive the wait for a deceased donor kidney. You could change my story! It all starts with a simple blood test. Could you be the match that saves my life?

HOW CAN YOU HELP?
